25X1

1. The naval shipyard at Oksywie has the following equipment: (See attached sketch for location of the shipyard)
 - a. One floating dock for ships up to about 450 BRT.
 - b. One 50 ton floating steam crane.
 - c. One 30 ton floating electric crane.
 - d. One 7½ ton stationary crane.
 - e. One well-equipped machine shop.
 - f. One large, well-equipped foundry.

The shipyard employs about 450 workmen and operates on two shifts.

2. During the war, the Germans constructed two shore-mounted torpedo projectors along the coast, north of the Oksywie naval harbor. These projectors were destroyed by the Germans when they retreated from the area, but they were reconstructed after the war.
3. Nearby the aforementioned projectors, and closer to the Oksywie naval harbor, there are six, well-concealed, large coastal artillery guns of 130-150 mm each. These guns are sheltered in concrete structures located about 30 to 50 meters from the gun platforms. The gun platforms and the shelters are connected by railroad tracks, which permits the navy artillerymen, who man the guns, to move the guns between the platforms and the shelters. Ammunition is also transported over these same tracks to the gun platforms. A well-camouflaged concrete road, which runs along the bottom of the nearby ravine, connects all of the gun emplacements. The entire area has been made into a military area and is guarded by sentries and dogs. Warning signs have also been erected in the area, and barbed wire about three meters wide and 1.60 meters high has been thrown up in many places.
